My Story

On Monday, March 8, 2010, David went to see a doctor about some numbness in his right hand and noticeably increasing slowness in his thought process. An MRI revealed a tumor about the size of a golf ball in the upper left hemisphere of his brain. The doctors are proceeding under the assumption that the tumor is fast growing and cancerous. He has been referred to a hospital in San Francisco and will, most likely, be undergoing surgery to remove the tumor Monday morning. We won't know for sure until after the surgery if the tumor is benign or malignant.
